vsmGadgetServer Release 5.6.3.150

Author: STB
Last updated: 2026-04-10
Release Date: 2026-04-10

This Release introduces new driver implementations, enhancements, and/ or fixes for the vsmGadgetServer application. Please consult the changelog for additional details.
Please note that vsmGadgetServer 5.6.3 and higher requires basic authentication (local windows user login) to access the configuration UI.

Also starting with vsmGadgetServer release 5.6.3.107, new created Ember+ providers will have the "Single Binding" mode enabled by default. This means that the provider will only send one binding at a time to the vsmGadgetServer. Also, the binding alias will not be sent, so the root node of the consumer will become the root node of the provider!

Please note that future versions may enforce a single Consumer<>Provider binding, therefore the exclusive use of "Single Binding" mode is strongly recommended!

Including

- **ClearCom HCI [2.0.37.0]**
 - [RNDVSM- 51224] Worked on reported issue where the port/conference mode was only updated on a GetDir of the node.
- **Sony CNA-2 [1.0.7.0]**
 - Worked on reported issue where the driver could not be loaded properly. This was caused by incompatibility of a dependency of the CNA-2 driver with other dependencies used by other drivers.
 - Worked on reported unnecessary matrix updates.
- **Snell RollCall [2.0.12.0]**
 - Fixed an issue on driver delete where not all resources got disposed correctly.
- **Ihse DracoTera [2.0.11.0]**
 - [RNDVSM-50938] Worked on missing ember+ updates on GetConsole responses.
- **Ihse DracoTera [2.0.10.0]**
 - [RNDVSM-50938] Worked on the reported bug where the crosspoints are not updated when polling is disabled.

Software-Download

The latest VSM software release versions can be downloaded from the Lawo Download Center @ <https://lawo.com/lawo-downloads>.

As always, **before updating, backup your system and refer to the changelogs/release notes** of each component to see if your system can be updated. Please also make sure to check and understand all changes, as well as any known issues that may be stated in the changelogs. A backup of the VSM directory is recommended before upgrade.
