Virtual Studio Manager – VSM

vsmPanelServer Release 1.3.0

Author: STB
Last updated: 2026-06-25
Release Date: 2026-06-25

This Release introduces new features, enhancements, and fixes for the vsmPanel Server application, serving vsmWebPanel Clients. Please consult the changelog for additional details.

Please also refer to the Server and Client user manual:
<https://docs.lawo.com/vsm-ip-broadcast-control-system/vsmwebpanel-server-and-client-user-manual>

Release Content

- Added the recording indicator. (RNDVSM-50187)
- Added a searchbox at the top of the panel list that makes it easier to find panels by name or number. (RNDVSM-51363)
- Separated the sign-in/sign-out button from the settings menu. (RNDVSM-51317)
- Fixed more edge cases that could lead to panel images being out of sync after failover.
- Fixed timed lock button not displaying the remaining time. (RNDVSM-51215)
- Add support for "Kiosk Mode" users. When Kiosk Mode users sign in, they will be remembered until they manually sign out (regardless of the "Remember Me" checkbox). This is a mode that can be set per user in vsmStudio. (RNDVSM-51232)
- Fix incorrect vsmStudio failover behavior.
- User sign-ins remembered via "Remember Me" will now still be remembered after a server restart.

Software-Download

The latest VSM software release versions can be downloaded from the Lawo Download Center @ <https://lawo.com/lawo-downloads>.

As always, **before updating, backup your system and refer to the changelogs/release notes** of each component to see if your system can be updated. Please also make sure to check and understand all changes, as well as any known issues that may be stated in the changelogs. A backup of the VSM directory is recommended before upgrade.
