Release Information

Virtual Studio Manager – VSM

vsmStudio Release 24.1.1 (B2406)

Author: STB
Last updated: 2024-02-02
Release Date: 2024-02-05

This Release introduces new features, enhancements, and fixes for the vsmStudio software. Please consult the changelog for additional details.

Including

- New Feature: Basic HOME Integration via HOME API.
- New Feature: Room Tally; allows mapping System Tally to production specific Room Tally.
- Enhancement: vsmShare; allows sharing signals from one vsmStudio system to another (Requires License!).
- Enhancement: Reduced unload / load time based on the ability to load a new configuration without closing the active configuration first.
- Enhancement: A view can be opened from "Rooms", to visualize the effective Room Tally of the contained sources and targets.
- Enhancement: Signals using the same SDPs no longer show the duplicate multicast warning in the Signal list, when used with different essence.

Software-Download

The latest VSM software release versions can be downloaded from
the Lawo Download Center @ https://lawo.com/lawo-downloads.

As always, **before updating, backup your system and refer to the changelogs/release notes** of each component to see if your system can be updated. Please also make sure to check and understand all changes, as well as any known issues that may be stated in the changelogs.

As upgrades may introduce a file format change (FFC), which implies incompatibilities of the configuration file of vsmStudio, please make sure to create a backup of your VSM directory before you upgrade.
