

Release Information

Virtual Studio Manager – VSM

vsmStudio Patch Release 24.1.3 (B2414)

Author: STB
Last updated: 2024-02-26
Release Date: 2024-02-26

This Patch Release includes important improvements and fixes on top of the latest vsmStudio Software Release 24.1.1 (& Patch Release 24.1.2). Please excuse the inconvenience.

Including

- TP#41213: switching home signals would dissolve associated virtual signals.
- TP#41170: Drag & Drop with ALT was not working when dragging Home Streams into network signal view.
- INC-38158: loading pooling signal assignment from storage would cause crash.

Software-Download

The latest VSM software release versions can be downloaded from the Lawo Download Center @ <https://lawo.com/lawo-downloads>.

As always, **before updating, backup your system and refer to the changelogs/release notes** of each component to see if your system can be updated. Please also make sure to check and understand all changes, as well as any known issues that may be stated in the changelogs.

As upgrades may introduce a file format change (FFC), which implies incompatibilities of the configuration file of vsmStudio, please make sure to create a backup of your VSM directory before you upgrade.
