Virtual Studio Manager – VSM

vTimeSync Release 4.5.2.0

Author: STB
Last updated: 2024-03-08
Release Date: 2024-03-07

This Release introduces enhancements, and/ or fixes for the vTimeSync application. Please consult the changelog for additional details.

Please note that vTimeSync 4.5.2 and higher requires basic authentication (local windows user login) to access the configuration UI. Also please note that the installer for the new version 4.5 will use the following default installation path "D:\vsm\vTimeSync".

If vTimeSync was installed and licensed already, please make sure that you install the new version to the same path as your current installation. The old default installation path was "C:\Program Files\Lawo GmbH\vTimeSync\".

If you would like to use the new installation path, please copy the file "vTimeSync.config.xml" into the new installation folder.

Including

- **Webserver now using https with selfsigned certificate**
- **Added core security features including User Authorization for Webinterface**
- **Sync status of remote host is no longer displayed in local Webinterface due to higher security requirements. A link to host Webinterface is provided instead**
- **Installer sets required firewall rules for the service**

Software-Download

The latest VSM software release versions can be downloaded from the Lawo Download Center @ <https://lawo.com/lawo-downloads>.

As always, **before updating, backup your system and refer to the changelogs/release notes** of each component to see if your system can be updated. Please also make sure to check and understand all changes, as well as any known issues that may be stated in the changelogs.

A backup of the VSM directory is recommended before upgrade.
