Virtual Studio Manager – VSM

vsmPanel Release 3.7.15

Author: STB
Last updated: 2024-03-19
Release Date: 2024-03-19

This Release introduces enhancements, and/ or fixes for the vsmPanel application. Please consult the changelog for additional details.

Important note

Since version 3.7.14, Windows OS versions 7 and 8.1 are no longer supported.

Including

- Added the ability to add 2 additional vsmStudio hosts.
- Moved the targeted .NET version to 8.0
- Moved the included .NET Desktop Runtime installer to version 8.0.2
- Updated referenced NuGet packages to newest versions.
- Added fix for vsmPanel not being able to connect when the host name can't be determined.
- Added fix crash when new vsmPanel instances can't acquire a session number.

Software-Download

The latest VSM software release versions can be downloaded from the Lawo Download Center @ <https://lawo.com/lawo-downloads>.

As always, **before updating, backup your system and refer to the changelogs/release notes** of each component to see if your system can be updated. Please also make sure to check and understand all changes, as well as any known issues that may be stated in the changelogs.

A backup of the VSM directory is recommended before upgrade.
