

## Release Information

# Virtual Studio Manager – VSM

## vsmStudio Release 24.3.1 (B2449)

Author: STB  
Last updated: 2024-07-24  
Release Date: 2024-07-24

This Release introduces new features, enhancements, and fixes for the vsmStudio software. Please consult the changelog for additional details.

### Including

- Feature: Support for HOME / .edge internal audio channel matrixes, including easy Layer and Signalpath creation
- Enhancement: Allow pre-assigned bridges for vsmShare
- Enhancement: Now both red and blue LLDP information are used to find bridges between systems
- Enhancement: Added support for tie-lines between SDNs
- Enhancement: Added workaround for some ember+ devices not responding to initial directory request
- Enhancement: A double click on one of the matrix view's movable separators will auto resize the matrix headers to fit the displayed signal name or label
- Enhancement: The log file now contains information about which server is the primary

## Software-Download

The latest VSM software release versions can be downloaded from the Lawo Download Center @ <https://lawo.com/lawo-downloads>.

As always, **before updating, backup your system and refer to the changelogs/release notes** of each component to see if your system can be updated. Please also make sure to check and understand all changes, as well as any known issues that may be stated in the changelogs.

As upgrades may introduce a file format change [FFC], which implies incompatibilities of the configuration file of vsmStudio, please make sure to create a backup of your VSM directory before you upgrade.
