

## Release Information

# Virtual Studio Manager – VSM

## vsmStudio **Hotfix** Release 24.3.1-2 (B2459)

Author: STB  
Last updated: 2024-10-15  
Release Date: 2024-10-15

This Hotfix Release includes important fixes for the vsmStudio software.  
Please consult the changelog for additional details.

### Including

- RNDVSM-50441: Network tie-lines configured with a very old version might act differently than those configured with an more up-to-date version causing visual ambiguity.
- RNDVSM-50439: SDN tie-lines would register to both layers as targets.
- RNDVSM-50336: The current source was not correctly displayed on linked panels.
- RNDVSM-50430/INC-42085: Race condition in critical format change handling for C100.
- RNDVSM-50387: UNDO does not undo duplicate page correctly.
- RNDVSM-50413: DAS would not monitor all nodes involved in script.
- RNDVSM-50330: HomeApp start/stop gadget parameter would display 0 when no servers were available.
- INC-41736: Race condition in the HOME integration.
- INC-41689: Abnormal rapid format changes could lead to a crash in the sdp format change detection.
- INC-41832: Drag and drop in master matrix could cause crash in specific cases.
- INC-41504: Some pseudo devices configurations could cause a crash when triggered
- RNDVSM-50277: Crash when opening the view of a room

## Software-Download

The latest VSM software release versions can be downloaded from the Lawo Download Center @ <https://lawo.com/lawo-downloads>.

As always, **before updating, backup your system and refer to the changelogs/release notes** of each component to see if your system can be updated. Please also make sure to check and understand all changes, as well as any known issues that may be stated in the changelogs.

As upgrades may introduce a file format change [FFC], which implies incompatibilities of the configuration file of vsmStudio, please make sure to create a backup of your VSM directory before you upgrade.
