

Release Information

Virtual Studio Manager – VSM

vsmStudio Release 25.1.1 (B2463)

Author: STB
Last updated: 2025-01-14
Release Date: 2025-01-14

This Release introduces new features, enhancements, and fixes for the vsmStudio software. Please consult the changelog for additional details.

Including

- RNDVSM-40603: Added the ability to share targets via vsmShare.
- RNDVSM-40604: Shared targets can forward their lock state to the consumer.
- RNDVSM-50245: Added “Organizational Folders” to storage groups. These allow for a more production-oriented storage in comparison to the existing locational organization.
- RNDVSM-40707: Various performance improvements to vsmShare.
- RNDVSM-41821: Network Tie-lines would be marked as “duplicates” despite being disconnected.
- RNDVSM-41726: Loading a storage disc containing signals which effected a summing matrix module could cause unexpected results.
- RNDVSM-41108: Added system assisted assignment of parameters, labels and tally when adding a HOME app MV.
- RNDVSM-40497: HOME based signal’s network interface assignments are automatically moved when the signal is moved within the [SDN] network.
- RNDVSM-40497: HOME app-based signal’s network interface assignments are automatically moved when the app is moved to a different HOME app server.
- RNDVSM-50456: It is now possible to feed a URL from a parameter to e.g. the browser page item via DAS.
- RNDVSM-50511: Possible crash when creating new DMV module.
- RNDVSM-50534: Buttons with an attachment which is deleted will no longer be removed.
- RNDVSM-50535: Panels might switch to the landing page after pushing the config.
- RNDVSM-50439: Switching network signals via tie-lines on a SDN system might trigger unrelated CPC retries.
- RNDVSM-50390: Loosing connection to the HOME node might cause crash.
- RNDVSM-50471: User label with line break character “\n” would influence default label behaviour.
- RNDVSM-50475: System colors were cleared when old config closed after new config loaded.
- RNDVSM-50492: Race condition in panel cache after deleting page items.

Software-Download

The latest VSM software release versions can be downloaded from the Lawo Download Center @ <https://lawo.com/lawo-downloads>.

As always, **before updating, backup your system and refer to the changelogs/release notes** of each component to see if your system can be updated. Please also make sure to check and understand all changes, as well as any known issues that may be stated in the changelogs.

As upgrades may introduce a file format change [FFC], which implies incompatibilities of the configuration file of vsmStudio, please make sure to create a backup of your VSM directory before you upgrade.
