vsmPanel Release 3.8.7

Author: STB
Last updated: 2025-08-13
Release Date: 2025-08-13

This Release introduces enhancements, and/ or fixes for the vsmPanel application.
Please consult the changelog for additional details.

Including

- Improved responsiveness when failover occurs.

- Added startup option *-followprimary* which makes vsmPanel strive to be actively connected to the primary vsmStudio instance.

- Added tooltip that shows current active and backup connections when hovering over the version/host info in the bottom right corner.

- Fixed: vsmPanel being unresponsive after a vsmStudio failover

- Fixed: Crash when "Fit To Window" is clicked while there is a Browser Page Item on the page. (RNDVSM-50713)

- Fixed: vsmStudio connection failover causing a visible page reload instead of being seamless. (RNDVSM-50904)

Software-Download

The latest VSM software release versions can be downloaded from
the Lawo Download Center @ https://lawo.com/lawo-downloads.

As always, **before updating, backup your system and refer to the changelogs/release notes** of each component to see if your system can be updated. Please also make sure to check and understand all changes, as well as any known issues that may be stated in the changelogs.
A backup of the VSM directory is recommended before upgrade.
