Virtual Studio Manager – VSM

vsmDiscover Release 2.2.17

Author: STB
Last updated: 2025-08-13
Release Date: 2025-08-13

This Release introduces enhancements, and/ or fixes for the vsmDiscover application. Please consult the changelog for additional details.

Important Note:

If upgrading to version **2.2.15 or newer**, it is necessary to **delete** the old **vsmDiscovery.dll** file in the running folder. Otherwise, the application may crash.

Including

- Fixed: Reported issue when importing device settings.
- Fixed: Encoding of special characters in the device location and comment fields.
- Added: Serial QR Code in device Description tab.

Software-Download

The latest VSM software release versions can be downloaded from the Lawo Download Center @ <https://lawo.com/lawo-downloads>.

As always, **before updating, backup your system and refer to the changelogs/release notes** of each component to see if your system can be updated. Please also make sure to check and understand all changes, as well as any known issues that may be stated in the changelogs.

A backup of the VSM directory is recommended before upgrade.
