VSM –RELEASE ANNOUNCEMENT

Version 17.2

AVAILABLE FEB 5TH 2018

CONTENT

This major release broadens the control of IP infrastructures within the VSM family of products once more. vsmStudio and vsmGadgetServer have been enhanced for the management of IP stream routing in redundant network environments, including but not limited to spine-leaf architectures of Cisco and Arista fabrics. Features integrated into VSM components for the purpose of IP orchestration are merged under *vsmSOUL*, Lawo's seamless orchestration and unification layer.

On top of that, this release contains many other enhancements, improvements and fixes for vsmStudio, vsmGadgetServer and other components.

Release 17.2 refers to vsmStudio built 2202, and all components listed below. For details, please refer to the changelogs and release notes provided with the components.

MAJOR CHANGES

vsmStudio	▪ Support of IP stream routing in A/B (red/blue) networks ▪ Introduction of multicast address and SDP handling to manage streams ▪ Initial support of Arista AMCS and Cisco DCNM
vsmGadgetServer	▪ Support of Evertz Multiviewer ▪ Support of Arista AMCS API ▪ Support of Cisco DCNM API ▪ Support of Tektronix Prism ▪ Support of S-A-M SDC (IP edge device control)
vsmDiscover	▪ Stability improvements
vsmGear	▪ Stability improvements
vsmPanel	▪ Functional and stability improvements
vSNMP	▪ Visual and functional improvements
vTimeSync	▪ UI improvements

RELEASE COMPONENTS

The following components are part of Release 17.2:

- vsmDiscover 2.2.12
- vsmEventImport 1.0.6
- vsmGadgetServer 2b0308
- vsmGadgetServer 5.4.0.287
- vsmGear B0026
- vsmPanel 3.4.8.13
- vsmRemoteMnoplProxy-1.0.16
- vsmStudio Build 2202
- vsmWebPanel-3.0.12
- vSnmp-2.0.2.1
- vTimeSync 4.3.2

SOFTWARE DOWNLOAD

To enable you to update systems with the latest version, this release can be downloaded from our online repository (as of FEB 6th, 2018). As always, **before updating**, **backup your system** and refer to the **changelogs/release notes** to make sure your system can be updated. Please also make sure to check and understand the **known issues** in the changelogs.
