Patch Release 2020-1-1

Patch Release 2020-1-1 comes with stability fixes based on Release 2020-1, and a functional enhancement in the vSNMP component.

vsmStudio Build 2323

- Various fixes and stability additions, please refer to changelog in product archive.

vsmGadgetServer v 5.6.1.100

- Some new drivers, various fixes and stability additions, please refer to changelog in product archive.

vSNMP v 2.0.0.16

- The retention time of log files can now be changed in the client.
- The message priorities to log can be now changed in the client.
- SNMP Messages are now initialized with the version number passed to the constructor. All previous version falsely defaulted to V1.

Software Download

To enable you to update systems with the latest version, this release can be downloaded from our online repository. As always, **before updating, backup your system and refer to the changelogs/release notes** to make sure your system can be updated. Please also make sure to check and understand all changes and especially the known issues listed in the changelogs.

As upgrades may introduce a file format change, which implies incompatibilities of the configuration file of vsmStudio, please make sure to create a backup of your VSM directory before you upgrade.
